

# ERGO DURAFLEX

# EXECUTIVE CONSOLE

## COMPLIANCE MEANS TRUST & SECURITY

The Ergo DuraFlex Console is the most secure console on the market today. The tamper-evident design and the placement of the all new metal striker with anti-pry device is the new higher standard for console security. The Ergo Duraflex is designed to ensure documents remain secure and confidential.

The Ergo DuraFlex also comes with the option of the ergonomic insert, allowing consoles to be emptied without bending reducing repetitive strain on back and knees during collection. The All Source Ergonomic Rigid Insert meets maximum volume restriction requirements for Joint Commission Compliance.

## COMPLIANCE IS A LAW, NOT A SUGGESTION

The easier the access to collection containers, the higher the level of compliance to policy.

Every office, reception area, conference room should have easy access to the proper secure container – otherwise confidential materials *will* end up in the trash!

### Benefits of the Ergo DuraFlex Executive Console

- Secure sensitive documents at the point of disposal
- Increased controls for information management chain of custody
- Improve document life cycle management processes
- Safeguards against breaches in confidentiality
