

95 GALLON SECURE COLLECTION CART

With a 95 gallon capacity, the Defender 95 can hold as much paper as you need, while still being compatible with mobile shredding trucks. Available in both a North American and European body style and with a selection of different lid options available, the Defender 95 is up to any task. For carts that are moved frequently, or typically have full loads, the Defender Max upgrade allows one operator to easily move two full carts around the facility.
