

SECURE TEXTILE COLLECTION CONTAINER

The Defender 65 Microfiber cart is your solution for micro-fiber and textile collection! The large 6"x10" opening allows for an open flow collection method, & bulk disposal needs.

The unique "dagger" locking system has been developed to work with containers using an inner bag or lining. The dagger lock allows a bag to be used without it conflicting with the locking mechanism. The Defender 65 Microfiber was developed for application flexibility without compromising on security.

Specifications:
