

## 95 GALLON FOUR WHEEL COLLECTION CART

The Defender 95 Max was designed with ergonomics in mind to become the most durable and efficient 95 gallon cart available! The Defender 95 Max is the highest capacity container available that can be emptied with a standard mobile shredding truck.

The Max utilizes all of the existing strengths of the container. With the addition of the engineered reinforcement plate to better distribute weight; the Defender 95 Max will carry an additional 40 lb over the standard cart, putting the load capacity at 375 lb!

### Specifications:
